# PDFtoPrinter

license MIT    downloads 11    🚀 Azure Pipelines succeeded

The PDFtoPrinter project Allows to print PDF files uses PDFtoPrinter util. The package contains PDFtoPrinter.exe and copys it to the output folder before build event. Also it provides PDFtoPrintWrapper class that runs PDFtoPrinter.exe inside of a "Print" method in a separate process with default timeout 1 minute (the timeout can be overrited by 3rd argument).

Sample usage:

```
var filePath = "c:\path\to\pdf\file.pdf";
var printerName = "Vendor Color Printer Name";
var printWrapper = new PDFtoPrintWrapper();
printWrapper.Print(filePath, printerName);
```

or

```
var filePath = "c:\path\to\pdf\file.pdf";
var networkPrinterName = "\\myprintserver\printer1";
var printTimeout = new TimeSpan(0, 30, 0);
var printWrapper = new PDFtoPrintWrapper();
printWrapper.Print(filePath, networkPrinterName, printTimeout);
```
